

# Nuriya Brand Book

Oct 7, 2026 · @Khaled

Nuriya is a Cairo women's clothing brand making comfy, oversized everyday pieces with a quiet, old-money feel. This book holds everything needed to design anything for it — a post, a label, a package or a website — and keep it unmistakably Nuriya.

## 1. The brand

Nuriya sells soft, oversized everyday pieces that feel relaxed but look polished — comfort with an old-money finish.

**Who it is for.** Young women — university students and early-career girls — who want one comfortable piece that styles both ways: old-money (pleated trousers, belt, leather bag) and casual (jeans or leggings, sneakers, cap). Modest and hijab-friendly by design: long sleeves, loose cut, longer curved hem.

**Positioning.** Quiet luxury at an everyday price. The piece does the talking through fabric, embroidery and color, not logos or noise. In the audience poll *Old money vs casual*, old money won 57% to 43% — lean into that look in hero content.

**Mission.** Make the everyday piece a girl reaches for first: comfy enough for a lecture, polished enough for coffee after.

## Brand values

- Quiet confidence — calm, never loud or flashy
- Comfort first — soft fabric, relaxed oversized fit
- Craft in the details — embroidery, ring-pull zip, contrast collar
- Made with love — a dream turned into a brand, told honestly
- Versatile — one piece, many outfits

**Personality.** Soft, warm, elegant, a little nostalgic (autumn, coffee, croissants, journals). Feminine without being girly-pink loud.

## 2. Logo

The logo is the handwritten script wordmark **Nuriya** — always the original artwork file, never retyped in a font.

| Version    | Logo                            | Background                             |

| Neck label | Red-burgundy script             | White woven tape                       |

## Rules

- Clear space: keep empty space around the logo at least the height of the "N" on every side.
- Minimum size: 25 mm wide in print, 120 px wide on screen. Smaller than that, the script fills in.
- Center it or left-align it; never squeeze text right up against it.
- Only use brand colors on it: plum, blush pink, white, burgundy.

## Never

- Retype "Nuriya" in a script font — AI and template fonts misspell it ("Nuliya", "Nautija" have already happened)
- Stretch, squash, rotate (except the embroidery tilt), outline, add shadows or gradients
- Put it on busy patterns where it can't be read
- Change the letter shapes or add decorations to the script

## 3. Color palette

Three brand colors carry everything — blush pink, plum and rose gold — with burgundy and cream coming from the product itself.

|                                                                                   |                                                                                   |                                                                                   |                                                                                    |                                                                                     |                                                                                     |

Product colors (the garments — match photos and mockups to these)

Burgundy is approximate from photos; for reorders, match the physical fabric or the supplier's Pantone code, not a screen.

### Support colors (UI and print helpers)

| Name                  | HEX     | Use                                |
|-----------------------|---------|------------------------------------|
| Soft Plum (body text) | #683A46 | Long text, table values            |
| Pink Tint             | #FFF0F6 | Alternate table rows, input fields |
| Hairline              | #E7C7D1 | Thin dividers, borders             |

**Styling palette** (props and outfits in content, never in brand graphics): black (19-3911 TCX Black Beauty), denim (17-4041 TCX Jeans Blue), vanilla cream #E6D7B8, beige trousers, chocolate-brown leather, gold jewelry.

**Proportions:** about 70% blush pink or white, 20% plum, 10% rose gold. Rose gold is never a background or body text — it is too light to read.

### Contrast (for website and small text)

- Plum on blush pink (13.6:1) and plum on white (16.6:1): pass for any text size
- Rose gold on blush pink (2.7:1) fails readability: decoration and short taglines only, never information people must read (prices, sizes, buttons). On white it reaches 3.3:1 — large text only
- Blush pink on plum (13.6:1) and Soft Plum on pink (7.6:1): pass for any text size

## 4. Typography

One script for the logo, one tall serif for headlines, Poppins for everything you read.

| Garment chest text     | Slab-style serif capitals (embroidery file) | —                | Production artwork, not a web font          | "QUIET CONFIDENCE"                            |
| Arabic                 | IBM Plex Sans Arabic (recommended)          | Regular / Medium | Pairs with Poppins                          | Arabic captions, policy, website              |

Poppins and IBM Plex Sans Arabic are free on Google Fonts. The display serif comes from your Canva templates — confirm its exact name (see open questions); until then, Bodoni Moda or Playfair Display is the closest free web stand-in.

## Rules

- Two fonts per design maximum, plus the logo
- Headlines in plum; never rose gold for body text
- Letter-space caps; never letter-space lowercase body text

## 5. Brand voice

Nuriya talks like a stylish best friend: short, warm, confident, never pushy.

### Tone

- Short lines. One idea each.
- Warm and personal ("girl", "you", "we") but never slang-heavy
- Confident, not loud — no shouting caps, no "BUY NOW!!!"
- Invites people in: questions, polls, "tell me which one's yours"
- English first, Arabic where it helps (policies, service); Egyptian warmth is fine in DMs

### Real lines that work (from your posts)

| Line                                                     | Use for                            |

| Not loud. Just unforgettable.                            | Hero line, website hero, campaigns |
| For the quiet confidence girl ✨                          | Product captions                   |
| Four fits, one vibe. Tell me which one's yours?          | Carousel captions, engagement      |
| Every stitch, every detail — handcrafted quality         | Close-up reels, product page       |
| Something beautiful is on its way.                       | Launch and coming-soon teasers     |

| Thank you for supporting a dream that started with love. | Thank-you card, About page         |
| Get yours now / DM to order                              | Calls to action                    |

**Words to use:** comfy, everyday, effortless, quiet confidence, soft, oversized, crafted, details, vibe, styling.

**Words to avoid:** cheap, sale-sale-sale, hype, trendy-for-a-week, "best quality in Egypt" style claims, too many emojis (one or two per caption, max).

**Caption formula:** one-line hook → one line about the feeling or styling → call to action ("DM to order 🛒").

**Hashtags:** keep a short fixed set, e.g. #Nuriya #QuietConfidence #EverydayPieces #ComfyFits #ModestStyle — confirm which you want to own.

## Construction

- Pointed polo / rugby collar in a contrast color
- Quarter-zip placket with exposed silver teeth and ring pull
- Oversized body, dropped shoulders, long sleeves, ribbed cuffs
- Curved, rounded hem
- Soft sweatshirt fabric (exact composition to confirm)
- Woven neck label: white tape, "Nuriya" in red-burgundy script

**Product naming pattern for future drops:** a two-word feeling in capitals embroidered on the chest (like QUIET CONFIDENCE), the small Nuriya script near it, and a handwritten line on the sleeve.

## Product page copy (ready to use)

**Quiet Confidence Quarter-Zip** — Not loud. Just unforgettable. A soft oversized sweatshirt with a contrast collar, silver ring-pull zip and our signature embroidery: "QUIET CONFIDENCE" across the chest and "do what you love, love what you do" on the sleeve. Style it old-money with pleated trousers or keep it easy with jeans and sneakers. Available in Cream and Burgundy, sizes S/M and L/XL.

## 7. Sizing

Two sizes, both cut oversized; garment measured flat, in centimeters.

| Size | Shoulder (cm) | Chest (cm) | Length (cm) | Suggested weight (kg) | Fit       |
|------|---------------|------------|-------------|-----------------------|-----------|
| S/M  | 56            | 56         | 64          | 45–65                 | Oversized |
| L/XL | 60            | 60         | 67          | 66–80                 | Oversized |

- All pieces are cut oversized for a comfy, relaxed fit.
- Between sizes? Size down.
- The published size guide card shows measurements and fit only; weight ranges are for DMs and the website's "find my size" help.
- Size labels read "S/M" and "L/XL" exactly — same on labels, website, captions.

## 8. Photography and visual style

The look is editorial and calm: off-white backgrounds, natural light, the burgundy piece as the one strong color in the frame.

## Shooting rules

- Backgrounds: off-white, light grey paper, cream walls, or soft city stone. Never busy or colorful.
- Light: natural daylight or soft window light. Avoid dim indoor light — burgundy turns almost black.
- Always show the embroidery clearly in at least one frame.
- Styling props stay in the palette: browns, creams, black, denim, gold jewelry, burgundy accents.
- Models: natural, smiling, relaxed poses; modest styling.
- Flat-lays: garment centered, accessories around it, generous empty space.

| Highlight cover           | 1080 × 1080, design inside a center circle | 1:1   |

**Mockups and AI images:** always check the logo and chest text are spelled correctly before posting — generated images misspell "Nuriya". Compare against the real product colors in section 3.

- Covers and titles use the condensed serif in plum or black, centered at the top.
- Pantone chips are a signature — keep using them on styling boards.
- Use polls and questions weekly; your poll and "which one's yours" posts get comments.
- Every caption ends with a call to action: DM to order.
- Reshare customer posts to stories with the NEW IN or REVIEWS highlight.

**Unboxing order (suggested):** mailer → tissue sealed with QR sticker → garment folded with collar and chest embroidery facing up → thank-you card on top.

**Print checklist:** CMYK PDF at 300 DPI, 3 mm bleed, text 3 mm inside the trim, request a physical proof, check the pink is soft (not bubblegum) on the proof.

## 11. Website
